

Senior Transportation

TRANSPORTATION SERVICES

At some point, like it or not, a lot of seniors end up relinquishing their car keys. Unfortunately, Transportation to basic services frequently becomes a problem. Instead of relying on caregivers, consider hiring grandchildren, or the grandchildren of friends. Most teenagers love to drive and earning money is something to make them happy as well. Senior escort services are available for those who are mobile but concerned about their safety. These services are available on fairly short notice and are meant for short trips to the bank or grocery store, for example. Contact your local senior center to find out more about services in your area. Also, some organizations offer transportation for their customers or clients. Hospitals, adult day care programs and senior centers are just a few examples.
